WITH PICKLED CODFISH.

British Steamer Baines Hawkins Arrived This Morning.

First Foreign Steamer To Bring Imported Cod Fare Here.

The British steamer Baines Hawkins arrived here this morning from Nell's Cove, C. B., with 400,000 pounds of pickled codfish consigned to Davis Bros.

So far as known, this is the first consignment of pickled codfish ever brought to this port from the Provinces in a steamer, and is the largest consignment of imported codfish ever received here.

The steamer had a close shave in getting clear of the ice on the start, and but for quick work would probably have been caught. On the way she touched at North Sydney, C. B., but her stay there was of the briefest possible space of time, as her captain felt that the ice was coming and to stay there perhaps an hour too long meant to be caught, with little show of getting out.

The fare is to be divided between Davis Bros., to whom it was consigned, John Pew & Son and Slade Gordon & Co.

Capt. Peters of the steamer says that he did not leave North Sydney any too soon, and Capt. Alex McEachern, who represented Davis Bros. in securing the fare, and remained behind at North Sydney and came home by train, says that had the steamer been 12 hours later she would not have been able to have got away. He says that in all his experience he never saw so much ice about Cape Breton as there was there when he left.

Capt. Peters reports a good passage with no accidents or mishaps.

HERRING DEMAND LIGHT.

Wholesale Trade in Boston Not As Good As Expected.

The wholesale trade in herring at Boston has not been as good this year as was expected, and two of the large schooners that came to T. wharf two weeks ago with cargoes of large food herring lie there still unloaded. Before the herring began to come there was a big demand for it on the part of the dealers, and when the first vessels arrived here the men could not unload the fish and fill the barrels quick enough to satisfy the demand.

Suddenly there was a let-up in the demand, and the unloading of the schooners slowed up. The fish still sell, but the demand for them is not as great as the owners expected. This is in part due to the coming in of the large quantities of haddock in the past week and a half, and perhaps more to the fact that the New York and Philadelphia markets have been cut off from the wholesalers and commission men here.

NOVA SCOTIA CODFISH.

Receipts for 1904 Below Average But Prices High.

The bank codfishery of Nova Scotia for 1904 was below the average; but prices mark the highest figures ever reached. The bank catch amounted to 145,000 quintals, which is 60,000 below the average. The average price paid to fishermen, ex-vessel, the past year was \$5.40.

Herring Notes.

Despatches from Anderson's Cove, Fortune Bay, N. F., states that when the weather is good, the fishermen can get from one to three barrels of herring to a fleet of nets. Six vessels are there and many fishermen are coming. The despatch says that the vessels there may get half or full loads.

A despatch from Rendcontre, Fortune Bay, N. F., states that the weather there is very stormy and the frost has been the hardest for 20 years. The weather had been so bad that the boats could not get out. Sch. Admiral Dewey had 350 barrels of frozen herring.

Four American vessels were at Long Harbor and the most any of them had was 100 barrels. Some herring are being taken in nets at Long Harbor. Sch. Maggie and May is reported at Connaigre bay with 250 barrels of frozen herring.

Sch. Atlanta will go to Rockport to take on her herring at the freezer there.

FISHING BY TELEPHONE.

German Patent for Locating Schools of Fish.

The latest use of the telephone is in locating shoals of fish. The electric apparatus is a German patent.

A microphone, inclosed in a water tight case connected with an electric battery and telephone, is lowered into the water. So long as the telephone hangs free no sound is heard, but on its coming into contact with a shoal of fish and constant tapping of the fish against the microphone case produces a series of sounds which at once betrays their presence.

The cord attached to the microphone is marked so that the exact depth of the shoal is designated.—New York World.

SUCCESS OF GLOUCESTER MAN.

Magnitude of Robinson Fisheries Company at Anacortes, Wash.

The TIMES is in receipt of an illustrated business edition of the Anacortes, Washington, American. A half page is devoted to The Robinson Fisheries Company, of which William F. Robinson, formerly of this city, is at the head. The article gives the history of the company, which has a paid up capital of \$100,000, and its large and steady growth.

Besides handling salt fish, the company has a large fertilizer and oil factory, and among the output last year, 200 tons of fish fertilizer was sent to Japan.

During the year 1905 great changes are to take place with the Robinson Fisheries Company and instead of sending one schooner to the Behring sea for codfish, the company will send three and will also buy the catches of other boats as they come in. It is the intention of this company to handle 1500 tons of fish next year, and in order to do so it will be necessary to build, and President Robinson has given out the statement as authentic that his company will, early this year, commence the erection of a large codfish plant on the water front. The building will have a ground space 150x150 and will be three stories high with a dockage of 150x350 feet. This will be the largest exclusive codfish plant on the Pacific coast north of San Francisco and will be a lasting monument to the enterprise and public spirit of Mr. W. F. Robinson.

The Robinson Fisheries Company is making great progress in other lines. In a few months a fish liquid glue plant will be added that the skins from the codfish may be utilized. This department will be under the supervision of Mr. Charles H. Robinson formerly of this city, a brother of the president.

The article has many illustrations, giving an excellent idea of the magnitude of the plant, showing a portion of the office, the box printing presses, dry fish room, skinning and boneing department and the fertilizer and oil factory.
